BACKEND:

Using node.js

```javascript
const express = require("express");
const app = express('app');

app.use(express.json());

let movies =[{
    id: "1",
    name: "ABC",
    date: "23-3-23"
}, {
    id: "2",
    name: "DEF",
    date: "23-3-23"
}
]

app.get('/', (req, res) => {
    res.json(movies);
})

app.post('/movie', (req, res) => {
    const movie = req.body;
    movies.push(movie);
    res.send("Object Added")
})

app.get('/movie/:id', (req, res) => {
    const id = req.params.id;
    const movie = movies.filter(f => f.id == id);
    res.json(movie);
})

app.delete('/movie/:id', (req, res) => {
    const id = req.params.id;
    const movie = movies.filter(f => f.id !== id);
    res.json(movie);
})

app.listen(8081, () => {
    console.log("Listening...");
})
```
